It has been providing New York City with entertaining and conscious Earth Day events since 2007. With the intention of encouraging CONSCIOUS AWARENESS of oneness and world peace as well as sustainability and caring for our planet for all humans and living beings of and including Mother Earth, in the footsteps of John McConnell, US Senator Gaylord Nelson, conservationist essayist John Muir, and the First Peoples of the Earth, with the countless millions of people around the globe who voice and act their concern and dedication for our planet’s protection on an ongoing basis. This year is the 48th anniversary of Earth Day. But as we believe, Every Day is Earth Day. May Peace Prevail on Earth.

“This is Planet Earth, yet, we are also living on **Planet Heart**. *Where our hearts beat as one - We Are One*. We just have to remember. This event is about bringing people together to remember who we are, to heal the world.” – Founder, Andrew Kaen.
